“Thank you for your business!”

Our History

The Eraser Company, Inc. was founded in 1911 and at that time, the only product manufactured was the Rush FybRglass® Eraser. In the 1940’s, Eraser discovered that the same abrasive material found in the Rush FybRglass® Eraser could remove enamel insulation from resistance and magnet wire. As a result, a new product line was born.

The company continually expanded and refined its product line to include all types of wire processing equipment including wire, cable, and tubing cutters, wire and cable strippers, wire twisters, wire brush wheels, reelers and dereelers, infrared heating equipment, measuring tools, and FybRglass® erasers.

The Eraser Company, Inc. attained ISO certification in 1996, thus emphasizing our commitment to providing our customers with relevant, high-quality products. Our ISO-certified commitment to continual improvement inspires us to include many new features and upgrades to our existing equipment offerings.

In 2004, Marcus BeVard, was appointed Chief Executive Officer of the company, and in January of 2006, he became President and CEO. Together with his mother, Chairman Renate BeVard, and Chief Operating Officer, Richard DePaulis, plus a skilled team of employees, Marcus BeVard continues to guide the company in maintaining its status as the globally recognized leader in wire, cable and tube processing equipment.

Our Future

Today, Eraser continues to provide superior industrial processing solutions to a broad customer base around the world. We are eager for the many new and exciting opportunities on the horizon. In the coming years we will continue to introduce state-of-the-art equipment to the market.
