M700 MODULAR SERIES

Introducing the M700 MODULAR SERIES

IT'S THE EDGE EVERYONE'S BEEN WAITING FOR.

In the world of wire and tube processing, cutting different materials and gauges has always required separate systems. The M700 Modular Series is a compact tabletop solution that allows you to quickly and easily swap out different modules to switch between wire, small tube and large tube processing.

The M700 Modular Series is designed to cut various materials to repeatable, accurate lengths by using a choice of multiple style cutting modules that can be used with or without the Feeder Module.

**ADAPTING TO DIFFERENT PROJECTS,
MATERIALS AND SPECIFICATIONS IS
SIMPLE AND TAKES ONLY SECONDS.**

AR3400 Feeder Module

For production optimization, the **AR3400 Feeder** Module transforms the Modular Series into a fully automated platform for processing your material. The Feeder Module delivers a precision method of material transport with accurate results.

AR3300 Control Module

The M700 platform offers maximum scalability to adapt to your changing processing needs. The **AR3300 Control** Module puts the flexibility of the Modular Series at your fingertips.

AR3500 Tube and Wire Cutter Module

The **AR3500 Tube and Wire Cutter** Module cuts wire and tube material to your specifications and uses a robust pneumatic-powered guillotine cutting system to easily cut flexible tubing and wire.

AR3600 Small Tube Cutter Module

The **AR3600 Small Tube Cutter** Module cuts small tubing to your specifications and uses an innovative cutting mechanism to cut flexible tubing squarely and with precision.

AR3700 Large Tube Cutter Module

The **AR3700 Large Tube Cutter** Module cuts large tubing to your specifications. The Large Tube Cutter Module uses an innovative cutting mechanism to cut flexible tubing squarely and with precision.

AR3800 Hard Wire Cutter Module

The **AR3800 Hard Wire Cutter** Module cuts hard wire to your specifications. The Hard Wire Cutter module uses an innovative (patent pending) pneumatic-powered cutting mechanism to cut fine hard wire.

SYSTEM FEATURES

- Fully scalable platform
- Easily interchangeable modules
- Remote/PC programming available
